Environmental Policy

Middle East Fuji Group believes in the concept of sustainable development, uniting protection of the natural and human environment with economic well-being. The Company integrates environmental considerations into its operations of Marine and offshore supplies of goods and materials to land based companies, hotels and other organizations; as well as provision of maker trained specialized engineering and technical services to marine, power and oil & gas industry.

To promote our environmental commitment at Middle East Fuji Group :

- 1 Include environmental cost if your accounting /QHSE team can show reports.
- 2 Conduct our operations in an environmentally responsible manner.
- 3 Strive to meet the needs & expectations of our stakeholders and applicable regulatory (including ISO 14001:2015) statutory and/or obligatory requirements.
- 4 Manage our activities to avoid, minimize and/or mitigate impact on the environment.
- 5 Reduce the quantity waste generated from our operations / facilities through correct selection, efficient use, reuse and of resources
- 6 Ensure that our environmental policy is communicated to all relevant stakeholders, and we collaborate with them to achieve common environmental goals.
- 7 Ensure that our personnel are aware of their contribution to successful implementation of this policy and to continual improvement of our established environmental management system.
- 8 Protection of the environment by preventing pollution and any factors that may cause a significant impact on climate change.
